

Anderson Acres

Grooming Essentials

In addition to basic grooming services, at times specialized care may be required to deal with skin conditions, allergies and parasites. At Anderson Acres, we provide these services, using only the finest in quality products that are safe for your pet.

Allergies

Kern County is truly the land of four seasons. These seasonal changes bring allergies, not only for us, but for our four-legged friends as well. Our pet care professionals can provide topical relief for your pet with a soothing medicated bath, a cooling herbal bath or luxurious conditioning treatment for ravaged skin and coat using ingredients that are natural and safe. Products supplied by your veterinarian can be applied in accordance with their instructions insuring the best results possible. We work closely with veterinarians to resolve skin and coat issues.

External Parasites

Unlike other areas around the country, much of Kern County is prone to flea and tick problems year-round. Except in higher elevations, rarely do we receive the cold snap necessary to break the cycles of these parasites. They are a product of the environment, and our pets many times play unsuspecting host, bringing them into our yards and homes where they can pose a health threat to our family and pets.

In order to rid your environment of these pests, you must eliminate them from the yard, home and pet simultaneously. We recommend the use of a licensed pest-control service for your premises. Our pet care professionals can provide the necessary relief for your pet. See your vet for prolonged care products.

Skin & Coat Care

Our pet care professionals are skilled in evaluating your dogs' skin and coat condition. Where your pet resides will determine the individual care required to maintain healthy skin and coat. This is an educational process based on breed and coat type, environmental issues and the owners' personal concerns and needs.

Here at Anderson Acres we pride ourselves on our knowledge of dogs and cats and the manner in which they should be cared for. Essential to a quality finished product is the prep work. We groom all breeds with specialties in large dogs, coated breeds, toy breeds and cats.
